

# Presence Options (UCE Desktop)

Last Modified on 03/14/2018 11:46 am EDT

Presence options let you automate some changes to your presence status.

1. Open the [Options screen](#).
2. Click **Presence**.

The screenshot shows the 'Options' dialog box with the 'Presence' tab selected. The left sidebar contains the following menu items: General, IM, Audio Device, Video Device, SIP Information, Change Password, Call, Notification, Presence (highlighted), Codec, Contacts export/import, and Outlook Contacts. The main content area is titled 'Smart Presence' and contains a checkbox labeled 'Change my status as Be right back when a Bluetooth device gets out of range'. Below this is a text input field for 'Bluetooth MAC Address'. Underneath is the 'Away' section, which includes a checkbox for 'Away Settings' and a label 'Change my status as Away after' followed by a spin box set to '5' and the word 'Minute'. At the bottom right are 'OK' and 'Cancel' buttons.

3. When you are done making changes to the options described below, click **OK**.

## Smart Presence

If you register your smartphone with Bluetooth, Smart Presence will automatically change your presence status to Away when you go outside of Bluetooth range.

Select the checkbox to enable Smart Presence, and then enter the smartphone's **Bluetooth MAC Address**.

## Away

**Away Settings:** If checked, your presence status will automatically change to Away after the number of minutes that you specify.
