

You've Got Mail!

Last Modified on 01/24/2018 4:52 pm EST

You'll know when you receive a new voice message in a variety of ways. All of these indicators will turn off when you have listened to all new voice messages.

- The Message button on the phone flashes.
- When you take the phone off-hook, you'll hear a stutter dial tone.
- If one of the feature buttons is programmed to your extension, its LED flashes.
