Install iPECS UCE Desktop Client

Last Modified on 11/30/2018 12:49 pm EST

The iPECS UCE Desktop Client is included for all Premium users, and is available for Windows PCs. Your iPECS administrator will provide you with the credentials you need to log in.

- Make sure you have local administrator rights for your Windows PC.
 NOTE: Your user account does not have to have local administrator rights. You do need the credentials for an account that has local rights.
- Download the iPECS UCE Desktop Client (available here, iPECS_UCE_for_Windows.zip).
- 3. Open the downloaded ZIP file.
- 4. Right-click on the install program file (IPECS_UCE_for_Windows.exe) and choose Open.
- 5. If the account you are logged in as does not have local administrator rights, you will need to supply the user name and password for an account that does at this time and then click Yes to continue. (If you are logged in as a local administrator, you do not need to provided credentials and you will not see these screens.)

Open Run as administrator		
Troubleshoot compatibility	5 User Account Control	
Pin to Start Scan with Windows Defender	Do you want to allow the following program to make changes to this computer?
