

Codec Options (UCE Desktop)

Last Modified on 03/14/2018 11:45 am EDT

Codec options are used to set priority for the codecs that will be used in a voice or video calls. Typically you will not need to change these options.

1. Open the [Options screen](#).
2. Click **Codec**.

Voice Codec: Select the voice codec to use.

Video Codec: Select H264.

3. Click **OK** to save your changes.
